

2021 - 2025

DATADOG | Product Design Manager

- Managed a team of 4 designers on Actions & Remediations (Workflow Automation & App Builder), leading product strategy and design direction across a suite of products that help customers automate tasks and build internal tools
- Drove cross-functional alignment between these platform products and Datadog products like Dashboards, Monitors, Security, and Infrastructure, establishing recurring touchpoints with product and engineering partners, including VPs and directors
- Cofounded Datadog's Design Mentorship Program and scaled it into the company's Global Mentorship Program, giving designers access to mentors beyond their own organization while expanding design's footprint across the company

DATADOG | Senior Product Designer

- Founding designer for Cloud Costs and Network Devices, leading two 0-to-1 products within Datadog's Infrastructure org designed for atypical Datadog users — finance/ops teams and network engineers — outside the company's core engineering audience
- Collaborated with product and engineering to build out team rituals and UX practices, evangelizing design and user-centered thinking within a highly technical organization
- Created reusable components and patterns adopted by other teams across Datadog, extending the impact of this work well beyond these two products

2019 - 2021

ATTUNE | Product Designer

- Designed dual-sided workflows that let brokers submit and manage insurance policies, and policyholders pay their bills
- Spearheaded Attune's company-wide rebrand, creating a new print and digital style guide and rolling it out across internal tools and marketing materials
- Built reusable components and patterns for Attune's UI design system

2018 - 2019

EBAY | Product Designer

- Designed merchandising experiences across eBay, including personalized product recommendations like "People also bought" and "You may also like," spanning desktop, mobile web, iOS, and Android

2017 - 2018

MORGAN STANLEY | User Experience Lead

- Designed digital assets for morganstanley.com and led design for the Investment Management team's lead generation tool

2015 - 2017

F SHARP | User Experience Designer

- Designed 100+ custom microsites connecting brands to users through music, for world-class brands including Coca-Cola, Disney, JC Penney, and Mitsubishi, distributed across leading platforms like Spotify, Billboard, and Pandora
